Sensors and Actuators A 45 (1994) 239–241

SENSORS AND ACTUATORS A PHYSICAL

Subject Index of Volume A 45

Anemometric sensors
study of autonomous mobile sensing system for localization of odor source using gas sensors and anemometric sensors, 153
Anisotropic etching
simulation of anisotropic chemical etching of crystalline silicon using a cellular automata model, 85
Astronomy
a novel heterojunction-based low-illumination image sensor, with applications to astronomy, 191

Bandwidth control
bandwidth control of an electrostatic ultrasonic transducer, 203
Bonding technique
a silicon condenser microphone using bond and etch-back technology, 115
Boron
boron-doped vapor-deposited diamond temperature microsensors, 131

Capacitive ultrasonic air transducer
electrostatic solutions for a capacitive ultrasonic air transducer with a uniformly V-grooved backplate, 95
Cellular automata model
simulation of anisotropic chemical etching of crystalline silicon using a cellular automata model, 85
Chemical vapour deposition
piezoresistive microsensors using p-type CVD diamond films, 35
boron-doped vapor-deposited diamond temperature microsensors, 131
Condenser microphones
a silicon condenser microphone using bond and etch-back technology, 115

Diamond
boron-doped vapor-deposited diamond temperature microsensors, 131
Diamond films
piezoresistive microsensors using p-type CVD diamond films, 35
Digital measurements
digital measurement of the mass-flow rate, 139
Dynamic non-linearity
on modelling the dynamic non-linearity of force-balance accelerometers (FBAs), 29
Dynamic testing
research on the dynamic test method for force-balance accelerometers (FBAs) with electric stimulation. Part 1. Errors analysis of current-source type FBAs, 23

Eddy-current sensor
profile imagery using a flat eddy-current proximity sensor, 183
Electron cyclotron resonance
characterization of piezoelectric properties of PZT thin films deposited on Si by ECR sputtering, 125
Electrostatic excitation and detection
electrostatically driven vacuum-encapsulated polysilicon resonators. Part I. Design and fabrication, 57
electrostatically driven vacuum-encapsulated polysilicon resonators. Part II. Theory and performance, 67
Electrostatic solutions
electrostatic solutions for a capacitive ultrasonic air transducer with a uniformly V-grooved backplate, 95
Electrostatic transducer
bandwidth control of an electrostatic ultrasonic transducer, 203
Equivalent circuit
electrostatically driven vacuum-encapsulated polysilicon resonators. Part II. Theory and performance, 67
Errors analysis
research on the dynamic test method for force-balance accelerometers (FBAs) with electric stimulation. Part 1. Errors analysis of current-source type FBAs, 23
Etch-back technique
a silicon condenser microphone using bond and etch-back technology, 115
Etch-stop properties
anisotropic etch-stop properties of nitrogen-implanted silicon, 219
Eutectic bonding
assembling three-dimensional microstructures using gold–silicon eutectic bonding, 227

Fibre-optic switch
fibre-optic 1×6 switch with smooth transmission spectrum, 109
Finite-difference modelling
two-dimensional modelling of a lateral magnetotransistor, 195
Force-balance accelerometers
research on the dynamic test method for force-balance accelerometers (FBAs) with electric stimulation. Part 1. Errors analysis of current-source type FBAs, 23
on modelling the dynamic non-linearity of force-balance accelerometers (FBAs), 29
Fuzzy reasoning
the discrimination of many kinds of odor species using fuzzy reasoning and neural networks, 159

Gallium arsenide
a micromachined mass-flow sensor with integrated electronics on GaAs, 91
Gas sensors
study of autonomous mobile sensing system for localization of odor source using gas sensors and anemometric sensors, 153

Gold
assembling three-dimensional microstructures using gold–silicon eutectic bonding, 227

Hard spring effect
electrostatically driven vacuum-encapsulated polysilicon resonators Part II. Theory and performance, 67
Heterojunction
a novel heterojunction-based low-illumination image sensor, with applications to astronomy, 191

Image sensor
a novel heterojunction-based low-illumination image sensor, with applications to astronomy, 191
Integrated electronics
a micromachined mass-flow sensor with integrated electronics on GaAs, 91

Lateral magnetotransistors
influence of topology on the response of lateral magnetotransistors, 179
two-dimensional modelling of a lateral magnetotransistor, 195
Lead zirconate titanate
characterization of piezoelectric properties of PZT thin films deposited on Si by ECR sputtering, 125
Leak monitoring
microwave acoustic sensing of water in hydrocarbon/water solutions, 99
Linear-array sensors
pyroelectric single-element and linear-array sensors based on P(VDF/TrFE) thin films, 209

Mass-flow rate meter
digital measurement of the mass-flow rate, 139
Mass-flow sensor
a micromachined mass-flow sensor with integrated electronics on GaAs, 91
Micromachined devices
development of micromachined devices using polyimide-based processes, 47
Micromachining
a micromachined pressure–time recorder for medical applications, 17
a micromachined mass-flow sensor with integrated electronics on GaAs, 91
Microsensors
analysis of an ambient temperature influence on the thermal thin-film microsensor, 169
Microstructures
assembling three-dimensional microstructures using gold–silicon eutectic bonding, 227
Mobile sensing system
study of autonomous mobile sensing system for localization of odor source using gas sensors and anemometric sensors, 153

Neural network
the discrimination of many kinds of odor species using fuzzy reasoning and neural networks, 159
Nitrogen
anisotropic etch-stop properties of nitrogen-implanted silicon, 219

Odor localization
study of autonomous mobile sensing system for localization of odor source using gas sensors and anemometric sensors, 153
Odor species
the discrimination of many kinds of odor species using fuzzy reasoning and neural networks, 159
On-chip detection circuitry
a surface micromachined silicon accelerometer with on-chip detection circuitry, 7
Optical sensor
optical sensor based on total internal reflection diffraction grating, 1

Photoacoustics
microwave acoustic sensing of water in hydrocarbon/water solutions, 99
Piezoelectric properties
characterization of piezoelectric properties of PZT thin films deposited on Si by ECR sputtering, 125
Piezoelectric slider
a scanning tunnelling microscope with a piezoelectric-driven inertial slider, 173
Piezoresistive microsensors
piezoresistive microsensors using p-type CVD diamond films, 35
Polyimide-based processes
development of micromachined devices using polyimide-based processes, 47
Polysilicon resonators
electrostatically driven vacuum-encapsulated polysilicon resonators. Part I. Design and fabrication, 57
electrostatically driven vacuum-encapsulated polysilicon resonators. Part II. Theory and performance, 67
Poly(vinylidene fluoride/trifluoroethylene)
pyroelectric single-element and linear-array sensors based on P(VDF/TrFE) thin films, 209
Pressure–time device
a micromachined pressure–time recorder for medical applications, 17
Profile imagery
profile imagery using a flat eddy-current proximity sensor, 183
Proximity sensor
profile imagery using a flat eddy-current proximity sensor, 183
Pull-in
electrostatically driven vacuum-encapsulated polysilicon resonators. Part II. Theory and performance, 67
Pyroelectric sensors
pyroelectric single-element and linear-array sensors based on P(VDF/TrFE) thin films, 209

Scanning tunnelling microscope
a scanning tunnelling microscope with a piezoelectric-driven inertial slider, 173
Sensing
microwave acoustic sensing of water in hydrocarbon/water solutions, 99
Silicon
simulation of anisotropic chemical etching of crystalline silicon using a cellular automata model, 85
a silicon condenser microphone using bond and etch-back technology, 115
characterization of piezoelectric properties of PZT thin films deposited on Si by ECR sputtering, 125
anisotropic etch-stop properties of nitrogen-implanted silicon, 219
assembling three-dimensional microstructures using gold–silicon eutectic bonding, 227
Silicon accelerometer
a surface micromachined silicon accelerometer with on-chip detection circuitry, 7

Silicon microphone
a small-size silicon microphone for measurements in turbulent gas flows, 103
Single-element sensors
pyroelectric single-element and linear-array sensors based on P(VDF/TrFE) thin films, 209
Surface micromachining
a surface micromachined silicon accelerometer with on-chip detection circuitry, 7
electrostatically driven vacuum-encapsulated polysilicon resonators. Part I. Design and fabrication, 57

Temperature microsensors
boron-doped vapor-deposited diamond temperature microsensors, 131
Temperature reference
tunneling thermometer, 145
Thermal sensors
analysis of an ambient temperature influence on the thermal thin-film microsensor, 169
Thermometer
tunneling thermometer, 145
Thin films
pyroelectric single-element and linear-array sensors based on P(VDF/TrFE) thin films, 209
Thin-film sensors
analysis of an ambient temperature influence on the thermal thin-film microsensor, 169
Topological influence
influence of topology on the response of lateral magnetotransistors, 179
Total internal reflection diffraction grating
optical sensor based on total internal reflection diffraction grating, 1
Transmission spectrum
fibre-optic 1×6 switch with smooth transmission spectrum, 109
Tunneling sensor
tunneling thermometer, 145
Turbulent gas flows
a small-size silicon microphone for measurements in turbulent gas flows, 103

Ultrasonic transducer
bandwidth control of an electrostatic ultrasonic transducer, 203

Vacuum encapsulation
electrostatically driven vacuum-encapsulated polysilicon resonators. Part I. Design and fabrication, 57
electrostatically driven vacuum-encapsulated polysilicon resonators. Part II. Theory and performance, 67
V-grooved backplate
electrostatic solutions for a capacitive ultrasonic air transducer with a uniformly V-grooved backplate, 95
